## DETAILED ACTION

### *Election/Restrictions*

Applicant's election without traverse of claims 1, 4-5, 8, and 15 in the reply filed on 12/27/05 is acknowledged.

### *Specification*

The abstract of the disclosure is objected to because the abstract contains more than 150 words. Correction is required. See MPEP § 608.01(b).

### *Claim Objections*

Claim 15 is objected to because of the following informalities: the semiconductor laser should emit an infrared laser **light**. Appropriate correction is required.

### *Double Patenting*

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned

Art Unit: 2828

with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 4-5, and 8 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 14-15, and 23 of U.S. Patent No. 6414973.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the individual claims 1, 14-15, and 23 of the conflicting patent disclose the same characteristics as called in the claims 1, 4-5, and 8 of this present application.

Claim 15 is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 23 of Hwu et al. U.S. Patent No. 6414973 in view of Colak U.S. Patent No. 5046803. Hwu et al. disclose all limitations of the claim 23 except for the semiconductor laser emitting an infrared laser light. Colak teaches the semiconductor laser emitting an infrared laser light (column 1, lines 35-36). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Hwu et al. what is taught by Colak because the semiconductor laser emitting infrared laser light used in conjunction with the frequency doubling device to provide blue laser light is inexpensive and widely available (column 1, lines 26-37).
